Which channels and segments produce pipeline that closes?

Total Closed-Won Deal Value (in USD*) · Win Rate · Median Conversion Time

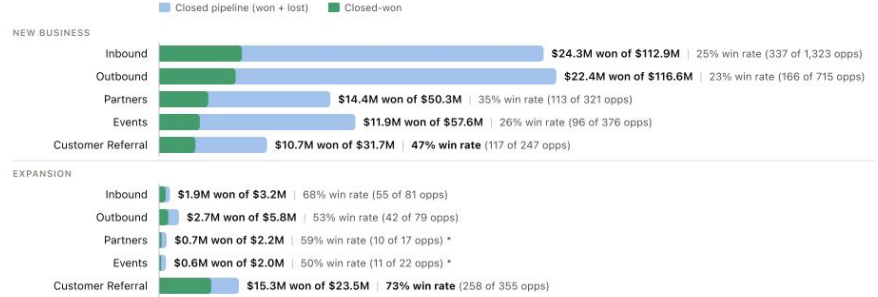

Data from October 2023 - September 2026 · FX converted to USD at exchange rate at time of close.

BY SEGMENT

Enterprise brings the most New Business value but has the lowest win rate. Mid-Market brings the most value for Expansion. SMB has the highest win rate across New Business and Expansion.

BY CHANNEL

Inbound and Outbound lead New Business. Customer Referral has the highest win rate across New Business and Expansion deals and leads Expansion.

Where is pipeline sitting right now, and what's at risk?

Open Pipeline (in USD) as of 9/28/2026

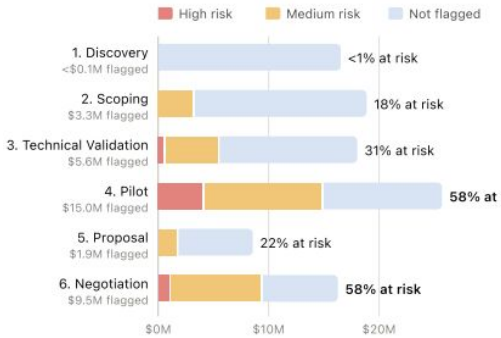

BY STAGE & SEGMENT

$104M open deals as of 9/28/2026, with 83% belonging to Enterprise ($86.2M).

Pilot stage contains the most open pipeline ($25.7M or ~25% of total).

BY STAGE & RISK LEVEL

34% of open pipeline is at risk* (159 of 611 open deals, $35.2M of $104M open pipeline).

*At risk (Medium) = past expected close date, or no activity in 14+ days. High = both.

Risk flags are operational signals and not loss predictions - a past-due date or no recent activity can also mean the CRM needs updating. No stage history is available, so time spent in each stage can't be measured.
